

Hello Willow Tree,

My name is Zach Carroll and I'm a senior at Muskingum University studying Computer Science. Being a student athlete in college I have acquired many valuable attributes that I will be able to transition into my future career endeavors. Having a consistent work ethic, managing my time efficiently and adapting to new changes are three particular scenarios that come to my mind that may be relatable to a future work environment. Having the experience of being a student athlete in college I believe is what sets me apart among other applicants. Alongside of that, I'm eager and I'm excited to graduate to really truly begin my future continuous learnings. To work alongside other experienced developers to grow from them, help my future employer to the best of my abilities and ultimately become the best developer that I can be!

Excited to hear more about this opportunity!

Thank You,
Zach Carroll
